Sebastián Escobar
Full-Stack & AI Developer

Bio

Passionate and enthusiastic technologist with a deep love for software and artificial intelligence. Over the past few years I have guided the end-to-end creation of web and mobile products, turning complex ideas into reliable, user-centred experiences and pairing them with cloud-native back-ends and automated delivery pipelines.

In my current role as a LATAM coding expert on Outlier, Scale AI's contributor platform, I craft high-precision datasets, chain-of-thought prompts and evaluation code that fine-tune large language models through RLHF and multi-step prompting, sharpening their reasoning across diverse domains. Earlier, as developer at nubot.io, I helped building an AI-driven CRM platform that deploys personalised chatbots over WhatsApp and other channels, blending retrieval-augmented generation with real-time analytics to help businesses convert chats into sales. This mix of model-training expertise and product engineering lets me move fluidly between data, algorithms and experience design, delivering AI solutions that feel as natural as the conversations they power.

Education History

-Data Structures & Javascript Certification
-Responsive Web Design Cerification
-Frontend Development Libraries Course
-Backend Development & API's Certification
-Scientific Computing with Python Certification
-Data Analysis with Python Certification
-Machine Learning with Python Certification
Institution: FreeCodeCamp.org

-Bachelor of Electronical Engineering
Institution: Universidad del Norte Barranquilla

Relevant Skills

- HTML, CSS, JavaScript, TypeScript, React, React Native, Next.js, Tailwind CSS, GraphQL with Apollo, Node.js, NestJS, Express, RESTful API design, Python, FastAPI, Django, PyTorch, scikit-learn, TensorFlow, Keras, LangChain, Retrieval-Augmented Generation and RLHF techniques, Docker, Kubernetes, Terraform, AWS (Lambda, S3, ECS), Google Cloud Platform (Cloud Functions, Firestore, Vertex AI), Firebase, PostgreSQL, MySQL, MongoDB, Redis, Jest.

- Front End & Back End Developer (Full-Stack)

- Agile methodologies: Scrum

- AI & Machine Learning developer (Proficient)

Job Experience

AI CHAIN (June 2023 – November 2024)

AI Researcher & Software Developer

OUTLIER (Scale) (November 2024 – Current)
Latam Coders Member, Coding Expertise & AI Trainer
